After a 15 year career in the AV/ live entertainment industry, I decided to enroll in coding bootcamp and pursue a career in the tech industry. I built a career in entertainment from the bottom up and worked for artists such as Paul McCartney, Ariana Grande, and Katy Perry. I bring the same energy that allowed me to cultivate that career growth to my new focus as a full Stack Web Developer. Teamwork and willingness to learn are my two strongest skills.

Projects

Bored-AF

Team Lead, Front End JavaScript

- The Purpose of the Project was to showcase the skills acquired in the first 6 weeks of BootCamp
- We used HTML, CSS, and JavaScript to make a webpage to help cure your boredom. I wrote many of the API calls and led the team to put this two week project together.

Puppy-Love

Team Lead, APIs and Express Server

- The Purpose of the Project was to showcase the skills acquired in the first 12 weeks of BootCamp
- We used mySql, Sequelize, Cloudinary, and Node Js, to put together a website that allowed a user to create a login, upload and manage pets on the site in hopes to find playdates for the furry family members. My role was team leader, and back end architect. I wrote many of the end points as well as setup the mySql database.

Professional Experience

Freelance (Upstaging Inc, Video Equipment Rentals, NorthCoast Projections Inc)
Touring Lighting Technician

2014 - 2022
Global

- Setup network based lighting equipment.
